

GEOG 4185/5185

STATISTICAL RESEARCH METHODS IN GEOGRAPHY

Foundations for Credible Geographic Research

This class surveys the conceptual and methodological foundations for investigation across the spectrum of geographic research. Our semester-long exploration examines the basic elements of the statistical toolkit that geographers, social scientists, and environmental scientists rely upon to power their work.

Spring 2021:

Tue/Thu 12:30 PM to 1:50 PM
