

LOCATION INTELLIGENCE RESEARCH PROGRAM

MURRAY RICE AND UNT GEOGRAPHY: TARGETED STUDENT RESEARCH POSSIBILITIES

Applied Geographic Research Focused on Businesses & Cities

My research program at UNT Geography and the Environment concentrates on issues related to the development of regional business complexes, with a particular interest in corporate decision-making and inter-city business information networks for businesses spanning the economy. I also have specific interests in retail, focused on retail development strategies and the impacts of retail change on local areas.

I am always interested in talking with potential graduate students.

Questions? Contact Dr. Murray Rice (murray.rice@unt.edu) or visit www.murrayrice.com and visit my research and teaching pages for my research and thesis supervision record
